**Pay via Mobile App or Web**

**License Plate Enforced**

**Park Anywhere**

**Pay By Mobile**

**Officer or LPR Enforced**

### Client Benefits

In addition to increasing customer satisfaction and repeat business through an enhanced touchless solution, there are numerous client benefits. For starters there is no client cost to enable on demand payments at gateless locations. Through the reduction or elimination of pay stations, warranty and maintenance costs can be reduced. Cash and coin costs can also be reduced or eliminated through reductions in cash collection and accounting. Once a user establishes an account repeat purchases are made at the touch of a button increasing revenue. When needed integration with our enforcement system address compliance and citations for offenders.

### Location Requirements

Implementing on-demand gateless capabilities at your location is easy. First your location must be set up for online selling through Parking.com. Once online sales are enabled, signs instructing customers how to access and use on-demand via the various options are strategically placed around the parking facility. Transactions are initiated through the Parking.com app or responsive web and automatically integrated into the automated or manual enforcement system utilized at the location.

### Fee Structure

There are no additional transaction fees to the client. A nominal service fee per activated session is added to the standard parking rate that is charged to the parker.

On Demand Parking is provided by Parking.com.
