

## Sphere Commerce™ On-Demand

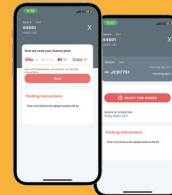

Convert your parking location with minimal to no investment into a revenue-generating asset.

Park in any open spot, anywhere within the lot.

Follow directions on sign to pay via QR code or text-to-pay.

Enter length of stay, vehicle and payment details.

### Optional Features

License plate recognition (LPR) or Enforcement officer.

### Customer Experience

On-Demand is the easiest, low-cost solution to convert your parking operation to a digital experience. Eliminate pay stations and reduce labor, maintenance and warranty costs.

Signs are posted around the lot, and collection of parking fees is contactless and frictionless. Guests scan a QR code, text or call and follow directions to enter their license plate, length of stay and then complete payment.

If a user chooses to establish an account on the On-Demand payment platform (parking.com), repeat purchases are made at the touch of a button, which increases loyalty and revenue.

When needed, integration with our enforcement system addresses compliance and citations for offenders.

### Key Benefits

- + Minimal to no capital investment required
- + Can be deployed in locations without well-defined entry/exit points
- + Maximize revenue collection and generation
- + Provide a frictionless and seamless experience for customers
- + Completely cashless operation.

### Enforcement

Enforcement is optional and fully customizable. Options exist for daily manual monitoring or fully automated in order to maximize revenue.
